Introduction

Welcome to Don't Skip a Beat!

THIS IS YOUR TOOL TO HELP YOU BECOME A HEALTHIER VERSION OF YOURSELF BY MAKING IT EASIER TO MANAGE YOUR MENTAL AND PHYSICAL HEALTH JOURNEY!

[GET STARTED](#)

MENTAL HEALTH

PHYSICAL HEALTH

NUTRITION

100

The Flexitarian Diet

This diet can be thought of as a flexible vegetarian diet. The majority of your diet will be plant based but you can still eat meat every so often. Consider starting out with 2 meat less days a week and working your way up to 5 over time.

[LEARN MORE](#)

Mediterranean Diet

This diet is based in fruits, vegetables, whole grains, nuts, seeds, and healthy fats found in foods like avocados and olives. You'll want to avoid processed foods and limit your sugar intake to reap the benefits of this diet.

[LEARN MORE](#)

Intermittent Fasting

The focus behind intermittent fasting is when you eat rather than what you eat. A popular application of this diet is the 16/8 method which give you an 8 hour window to eat and 16 hours to fast. It's important to make healthy food decisions during your 8 hours so you have the energy you need. It's also important to stay hydrated especially during your fast.

Problem Statement

- Data collected from the CDC
 - Physical health
 - Mental health
- How can we provide a platform to inform local users in the St. Louis area of ways to efficiently manage their health.

Team Goals/Contributions

Team's Exprince:

Provided the user with a platform to inform and monitor mental and physical health.

- **Kevin:** designed the website and linked appropriate content
- **Daniel:** cleaned .csv file using a Jupyter Notebook through a Google Cloud Ai Platform
- **Sofiyah & Ayomide:** set up and organized the repository and made it a public domain for everyone to see

What was Learned

- GitHub Repository usage
- Usage of HPC by using Jupyter Notebook through a Google Cloud AI Platform
- Data Cleaning of a .csv (comma-separated values) file
- High-Leveled Python programming
- Balsamiq Wireframing

BMI	Category	Class	BMI Categories	Weight classification	Response	Break Out	Break Out Category	Sample Size	Data value	Confirmed
600	Underweight	Obese	Underweight (BMI 12.0-18.4)	Underweight (BMI 12.0-18.4)	Obese	Obese	Obese	103	2.22	
601	Underweight	Obese	Underweight (BMI 12.0-18.4)	Underweight (BMI 12.0-18.4)	Obese	Obese	Obese	103	2.22	
602	Underweight	Obese	Underweight (BMI 12.0-18.4)	Underweight (BMI 12.0-18.4)	Obese	Obese	Obese	103	2.22	
603	Underweight	Obese	Underweight (BMI 12.0-18.4)	Underweight (BMI 12.0-18.4)	Obese	Obese	Obese	103	2.22

Goal Reached and Next Steps

Accomplishments:

- Functional Website
- Data aggregated
- Github Repository

Future Steps:

- Mobile app creation for live user input with access to smart watch health information.
- Finding data sets with height and weight to provide a more specific calculation.

A Big Thank You!

- Thank you to all of the mentors and special thanks to our mentors Josselyn Salgado, JerNettie Burney, Marcus Golden and Boyd Wilson.
- Thank you to all the supporting organizations!
- Thank you to SC21 for this amazing opportunity!
